Starna Scientific The Spectroscopy Specialists

Cells/Cuvettes for all
Spectrophotometer
Fluorimeter and
Laser applications

Introduction to Starna®

The wide variety of Starna® products in this catalogue are manufactured in the Starna Scientific Ltd (formerly Optiglass Ltd) factory founded in 1964, whose lineage of optical expertise is traceable to the early part of the last century.

Starna Scientific is the manufacturing division of the international group of Starna® companies, who have a recognised world-wide reputation for quality, service, innovation and co-operation in the production and supply of spectrophotometer cells, optical components and certified reference materials.

During the 1950s, the founding members of the company developed and perfected the technique of fully fusing optically polished component parts by heat alone, without distortion. This major advance transformed the design and production of spectrophotometer cells and associated products. Continual development and improvement is reflected in the high quality world class Starna® products.

All manufacturing processes are carried out in an ISO 9000 certified production facility, from design and development of product to customised production machinery. The unique blend of skills including: cutting, slicing, grinding, polishing, conventional drilling, ultrasonic drilling and fusing as well as metallic, multi-layer and anti-reflection coating in one of many coating plants, achieves a complete vertically integrated manufacturing process.

During manufacture of all component parts, special care is taken to avoid contamination by the use of stringent cleaning processes. Together with mandatory inspection procedures these stringent cleaning processes ensure all products leave the factory in a pristine contamination-free condition, with an unconditional guarantee against faulty workmanship. This special treatment of cells together with internally profiled cells reduces bubble adhesion, particularly important in flow cell applications.

In addition to the ISO 9001 certified manufacturing facility, the **Starna Reference Material Calibration Laboratory** which has been UKAS accredited to ISO 17025 since 2001, also achieved ISO guide 34 in 2006, the highest level of accreditation, recognised world-wide. The unique combination of manufacturing, application and laboratory skills, permits full traceability throughout the whole production process, making Starna Scientific a unique partner to instrument manufacturers, dealers and retail customers worldwide who require completely independent guaranteed validation reference materials for analytical equipment.

Cell specifications

Starna® spectrophotometer cells and other quartz and glass assemblies, unless precluded by design, are assembled using a fully fused method of construction. This technique, pioneered and used by Starna Scientific since the mid 1950s, ensures that cells are fused into a single homogeneous entity using heat alone, without intermediate bonding materials. All cells are then carefully annealed to remove any residual strain from the fusing process. This ensures maximum physical strength as well as resistance to solvents. With few exceptions, most cells can be used safely with pressure differentials of up to 3×10^5 Pa (3 Bar) and some up to 10×10^5 Pa (10 Bar).

General specifications

Windows parallel to: better than 3 minutes of arc
 Window flatness to: better than 4 Newton fringes
 Window polish, standard: 60/40 scratch/dig
 Window polish, laser: 20/10 scratch/dig

Material	Path lengths	Tolerance
Glass	less than 10mm	± 0.02mm
Glass	10 to 30mm	± 0.1mm
Glass	40 to 100mm	± 0.2mm
Special Optical Glass	up to 20mm	± 0.01mm
Special Optical Glass	30 to 100mm	± 0.02mm
Quartz	0.01 to 0.05mm	± 0.002mm
Quartz	0.1 to 0.4mm	± 0.005mm
Quartz	0.5 to 30mm	± 0.01mm
Quartz	40 to 100mm	± 0.02mm

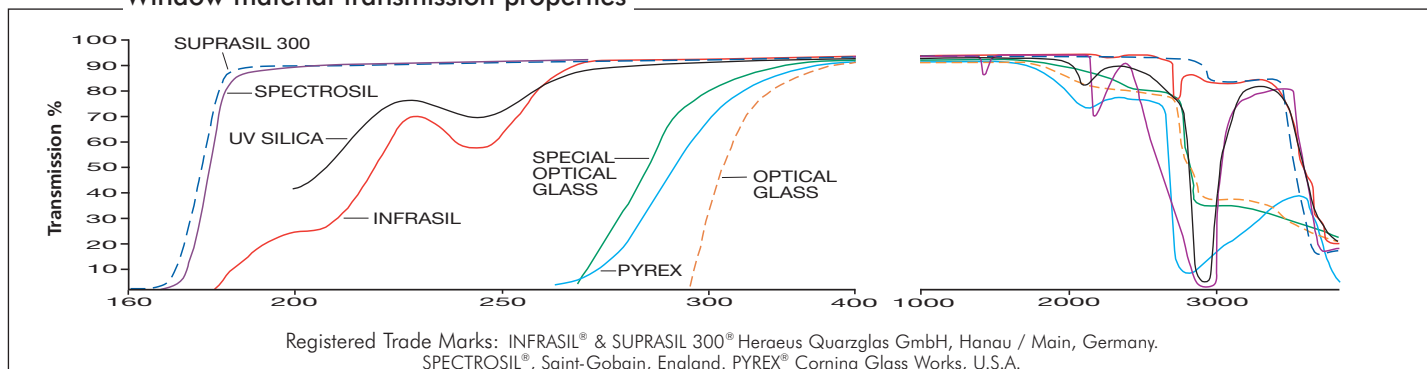

Standard window thickness is 1.25mm, polished to better than 4 Newton Fringes per centimetre in the viewing area, typically flat to better than 1 micron (0.001mm) over the window area.

Although cells can be used with most solvents and acidic solutions, fluorinated acids such as Hydrofluoric Acid (HF) in all concentrations should be avoided as they will attack the quartz itself. Strong basic solutions (pH 9.0 and above) will also degrade the surface of the windows and shorten the useful life of the cells.

Flow cells with path lengths of less than 0.5mm are measured by an interference method both before and after final fusing. Calculation on this measurement provides an uncertainty of path length better than 0.2 microns (0.0002mm). Path length certification can be supplied for individual cells for a small additional charge. This should be requested at the time of ordering.

Water absorption band **OH content ppm (mg/g)**
Infrasil ≤ 8, **Suprasil 300** ≤ 1.

Window material transmission properties

The above information illustrates the approximate transmission ranges of the guaranteed materials used in the production of Starna cells. The spectra does not take into account reflective losses from optical window surfaces which may vary depending on the material measured, resulting in actual measured transmission between 80%T and 90%T. Windows are normally 1.25mm thick and therefore the absorption of the windows themselves can be disregarded for normal analytical purposes.

Contents

Absorption cells	27	Sub-micro, de-bubbler	19
Accessories	28	Ultra-micro	19 & 20
Caps		Long aperture	15 - 17
Cell holders		Round aperture	19 & 20
Cell spacers		Wide aperture	15 - 17
Funnels		Medium aperture	15 & 16
Lids		Fluorescence reference materials	30
Magnetic stir bars		Fluorimeter cells	21 - 25
Mirror coatings		Standard rectangular	21
Quartz block inserts		Micro & semi-micro, with & without stopper	21 & 22
Stoppers		Micro cell adaptors - FCAs	21
Anaerobic cells	12	Sub-micro	22
Aspiration cells, micro and semi-micro	18	Flow cells, all types	14 & 24
CD matching	4	Triangular open top/stopper	23
Cell matching	4 & 2	Constant temperature	25
Cell specifications	2	Gel boat cells	27
Cell stirrer (Spinette)	30	Magnetic stirring cells	26
Colorimeter cells	27	Micro cells with lid or stopper	7
Connector fittings	29	Micro cells self-masking with lid or stopper	7
Constant temperature cells	25	Micro cells short	6
Cube cells	23	Micro cells short, self-masking	6
Cylindrical cells	10	Mixing cells	23
Constant temperature	25	NIST traceable certified reference materials	30
Short path	10	Polarimeter cells	26
Short path, micro	10	Quartz/Pyrex graded seals fused to cells	11
Standard	10	Rectangular cells with small screw caps	12
Large diameter	10	Reference materials, liquid and glass	30
With tube	10	Refractometer cells	25
With graded seal	11	Screw cap & septum cap cells GL14	12
Demountable cells, short path length	13	Semi-micro cells with lid or stopper	6
Dissolution cell construction	16	Semi-micro cells self-masking with lid or stopper	6
Divided cells	23	Small screw cap & septum cap cells	12
Dual path length cells	23	Standard rectangular cells with lid or stopper	5
Dye laser cells	26	Sub-micro cells with lid or vaned stopper	8
Flow cells	14-20	Sub-micro and multi-micro cells short	8
Dissolution cells	15-17	Sub-micro cells, low headspace	9
Fittings	29	Sub-micro cells with stopper	9
Fluorimeter	24	Suction cells	18
Fluorimeter HPLC	24	Tandem cells	23
HPLC	18	Terms of sale	30
Short path	14 & 17	Transmission specifications	2-4
Short path, demountable	14	Ultra-micro cells	9
In-line and Microscope analysis, in line	13-14	Ultra-micro lens cell	9 & 23
Standard & Semi-micro	15	UHV cells with stopcock	11
Sub-micro	16	Z Height dimension	4

How to order

Essential ordering information is shown under the **Blue column headings** throughout the catalogue. Detail shown under the black headings is additional descriptive and dimensional information and need not be included. eg. to order Type **1/I/10** (Standard Rectangular, Infrasil, 10mm Path length)

Type No.	Window Materials	Path Length	Internal Width	External L W H			Nominal Vol. ml
1	G, SOG, PX, HH, Q, I, SX	10	10	12.5	12.5	45	3.500

eg. to order Type **19.01/Q/1/Z8.5** (Ultra-micro, Spectrosil, 1mm path length, 8.5mm Z dimension)

Type No.	Window Materials	Path Length	Z Height	Sample chamber W H		External L W H			Nominal Vol. ml
19.01	SOG, Q	1	8.5, 15, 20	5	1	12.5	12.5	40.5	0.0050

Material specifications

Starna Scientific offer five primary window materials, Optical Glass (G) and Special Optical Glass (SOG) for the visible range. Spectrosil® Quartz (Q) or equivalent for the far UV range, Infrasil® Quartz (I) or equivalent for the near infra-red (IR) as well as Suprasil 300® (SX) or equivalent which transmits from the far UV to the near infra-red. Other window materials are also available such as Pyrex® (PX) and UV Silica (HH).

If a specific window material is required and is not shown in this catalogue please contact us for availability. All materials used are fully guaranteed to transmit greater than 80% over the following usable wavelength range:

Optical Glass	G	334 through 2500 nm
Special Optical Glass	SOG	320 through 2500 nm
Borosilicate	PX	325 through 2500 nm
UV Silica	HH	230 through 2500 nm
Spectrosil® Quartz	Q	190 through 2700 nm
Infrasil®	I	220 through 3800 nm
Suprasil 300® Quartz	SX	190 through 3500 nm

For fluorescent applications Spectrosil® is the recommended window material, as it does not exhibit any background fluorescence. Some other materials, especially glass and lower grades of quartz may have some background fluorescence.

The meticulous care taken in the quality of the polishing and unique construction of regular Starna® quartz fluorescent cells brings them within tolerances which are sufficiently stringent for them to be used in laser applications. These techniques are particularly relevant in the manufacture of much larger Ultra High Vacuum (UHV) cells.

Cell matching

Modern production and fusing techniques, together with consistent raw materials, have virtually eliminated the need for transmission matching in regular standard high grade quartz cells.

The extremely accurate physical path length tolerances used in production, stated on page 2, are essential especially on very short path lengths, for instance in dissolution measurements where multiple short path length cells may be used. Such flow cells Types 73, 74, 75, 583, 584 and 585 each have a unique fully traceable serial number engraved on the window. Cells with path lengths less than 0.5mm are measured using an interference method both before and after final fusing to provide a path length uncertainty calculation better than 0.2 microns (0.0002 mm). A certificate of path length and full production traceability can be provided for each individual cell on request, for a small additional charge.

Cells manufactured for **Circular Dichroism(CD)** must have strain-free oriented windows and the complete cell carefully annealed. This process incurs an additional charge for each cell. Cells required for **CD** must have this suffix **CD** added to the part number e.g. 34/Q/50/CD.

Z Height dimension - IMPORTANT!

The 'Z' height is the distance from the bottom of the cell holder cavity to the centre of the incident light beam profile, which can be round, rectangular or curved. For the most efficient use of energy and sample volume the sample chamber aperture should ideally encompass the light beam with a small extra margin to avoid beam clipping.

The 'Z' height of the cell, the distance from the centre of the cell sample chamber aperture to the base of the cell, should match to that of the instrument.

Manufacturers have generally designed their instruments with 'Z' dimensions ranging from 5 to 20mm with 8.5 or 15mm being the most popular.

Choosing the correct cell 'Z' height is very important when the aperture in the cell is very small, as in sub-micro cells and micro flow cells.

The standard 'Z' heights for any cell, where this information is critical, are shown in a separate column in the information tables, headed 'Z' Height. Other 'Z' dimensions can be supplied on request.

The correct 'Z' height should be added to the part number e.g. if 8.5mm is required it should be shown as follows 73.4/SOG/10/Z8.5. As a double check at the time of ordering, it is beneficial to state the instrument make and model number for which the cell is required.

All dimensions stated in this catalogue are in millimetres unless otherwise indicated

When cells matched for transmission are required, mainly but not exclusively for less consistent materials such as Glass and Special Optical Glass where transmission characteristics from melt to melt differ, each measured cell is given a match code relative to its transmission at a given wavelength as measured on a spectrophotometer. The transmission matching tolerances at measured wavelengths are shown as follows:

Window Material	Matching Tolerance	Measured at Wavelength
Optical Glass	0.5 %	350nm
Special Optical Glass	1.0%	320nm
Borosilicate	1.0%	320nm
UV Silica	1.5 %	240nm
Spectrosil® Quartz	1.5 %	200nm
Infrasil® Quartz	1.5 %	240nm
Suprasil 300®	1.5 %	240nm

The matching codes are only of real value when comparing new cells as transmission characteristics change during use because of surface contamination or wear due to cleaning processes. Therefore a brand new cell may not identically match an older used cell of the same match code.

Type 1. Macro/Standard Rectangular, reduced volume with lid

- Open top, with non-sealing PTFE cover.
- Polyethylene vaned lid available on request for 10mm cells only, providing a liquid-tight seal. (see page 28)
- Two polished windows.
- Walls polished internally, fine ground externally.
- Suitable for use with all standard cell holders.
- **Type 1/B** has black side walls.
- **Type 1/10/CD** thick base, reduced sample for CD.
- Cell compartment spacers **SPA** available for 1, 2 & 5mm Path length cells (see page 28).

Type No.	Window Materials	Path Length	Internal Width	External L	External W	External H	Nominal Vol. ml
1	G, SOG, Q, I, SX	1	10	3.5	12.5	45	0.400
1	G, SOG, Q, I, SX	2	10	4.5	12.5	45	0.700
1	G, SOG, Q, I, SX	5	10	7.5	12.5	45	1.700
1	G, SOG, PX, HH, Q, I, SX	10	10	12.5	12.5	45	3.500
1	G, SOG, Q, I, SX	20	10	22.5	12.5	45	7.000
1	G, SOG, Q, I, SX	40	10	42.5	12.5	45	14.000
1	G, SOG, Q, I, SX	50	9.5	52.5	12.5	45	17.500
1	G, SOG, Q, I, SX	100	9.5	102.5	12.5	45	35.000
1/B	Q	10	10	12.5	12.5	45	3.500
1.7	G	10	10	12.5	12.5	70	6.500
1.100	G	10	10	12.5	12.5	100	10.000

1/10/CD	Q, I	2	10	4.5	12.5	45	0.450
1/10/CD	Q, I	5	10	7.5	12.5	45	1.200
1/10/CD	Q, I	10	10	12.5	12.5	45	2.500

For GL/14 Screw tops, graded seals & straight bore tubes - See pages 11 & 12

Type 21. Macro/Standard Rectangular, reduced volume with stopper(s)

- Closed by PTFE stopper(s), providing a liquid-tight seal.
- Two polished windows.
- Walls polished internally, fine ground externally.
- Suitable for use with all standard cell holders.
- **Type 21/10/CD** thick base, reduced sample for CD.
- Cell compartment spacers **SPA** available for 1, 2 & 5mm Path length cells (see page 28).

Type No.	Window Materials	Path Length	Internal Width	External L	External W	External H	Nominal Vol. ml	Remarks

standard rectangular with lid and with stopper

Type 8. Micro short

- Open top, supplied with non-sealing PTFE cover.
- Two polished windows.
- Walls polished internally, fine ground externally.

Type No.	Window Materials	Path Length	Internal Width	External L	External W	External H	Base Thickness	Nominal Vol. ml
Clear walls								
8	SOG, Q	5	4	7.5	12.5	25	3	0.400
8	SOG, Q	10	4	12.5	12.5	25	3	0.800
Self-masking. Black walls								
8/B	SOG, Q	5	4	7.5	12.5	25	3	0.400
8/B	SOG, Q	10	4	12.5	12.5	25	3	0.800

Type 9 & 9/B. Semi-micro with lid

- Reduced nominal volume to <50% of Standard rectangular.
- Open top, supplied with non-sealing PTFE cover.
- Two polished windows.
- Walls polished internally, fine ground externally.
- Suitable for use with all standard cell holders.
- **Self-masking solid black walls** enhance sensitivity and improve linearity at higher absorbances.

28/B/9	SOG, Q, I, SX	10	2	12.5 12.5 48	9	0.580

Type 15. Sub-micro & Multi-micro, short

- Two polished windows.
- Open top.
- To be used with holder supplied by instrument manufacturer.

Type 17. Micro short

- Two polished windows.
- Open top, supplied with non-sealing PTFE cover.
- Walls polished internally, fine ground externally.
- Base thickness - 3mm.

Type 16 & 16R. Sub-micro

- Sub-micro volumes from 10µl to 160µl.
- **Type 16** has a top section; comprising two black walls and two translucent side walls with a square internal cross-section.
- Open top, supplied with non-sealing PTFE cover as well as a vaned lid to provide a liquid-tight seal.
- To avoid possible meniscus errors; it may be necessary to increase the nominal sample fill volume by at least 20%.
- Z dimension measurement or instrument information is required when ordering.
- May be used with all standard cell holders.
- Filling and emptying with a pipette is recommended.
- **Type 16R.** Similar to **Type 16** except that the top section is solid black quartz and round internal cross-section.
- Closed by a vaned polyethylene plug stopper to provide a liquid-tight seal.

Vaned polyethylene lid
Part No. Lid/1.010V

Type 26. Sub-micro & Ultra-micro with stopper

- Reduced nominal volume from 10 μ l to 160 μ l.
- Rectangular top section with two black walls and two translucent walls.
- Closed by PTFE stopper, providing a liquid-tight seal.
- To avoid possible meniscus errors; it may be necessary to increase the nominal sample fill volume by at least 20%.
- May also be used with all standard cell holders.
- Z dimension or instrument information required when ordering.
- Filling and emptying with a pipette is recommended.

Type 26/LHS. Sub-micro, low head space

- The cell and liquid-tight stopper are specially designed so that the volume of air above the sample is reduced by >95% compared with normal sub-micro cells.
- This reduces evaporation loss of samples such as DNA to a minimum.
- Reduced nominal volume range from 10 μ l to 440 μ l.
- Round internal solid black top closed by a specially profiled PTFE stopper. Spare stoppers, **see page 28**. Part No. STP/C10.LHS/Z8.5 or STP/C10.LHS/Z15/20
- To avoid possible meniscus errors; it may be necessary to increase the nominal sample fill volume by at least 20%.
- Sample may be introduced and retrieved by a syringe or micro pipette.
- Z dimension or instrument information required when ordering.

Type 19 Ultra-micro & 19/L Ultra-micro lens cell

- Ultra-micro volume range from 0.5 μ l to 10 μ l.
- Two polished windows.
- Sample inserted and retrieved with micro pipette tip.
- Two micro pipette tips provided with each cell.
- **Type 19/L** is a patented design with integral lens.
- The focusing lens increases the energy entering the sample.
- **Type 19/L** is not suitable for all instruments.
- Performance is dictated by instrument optical configuration.
- Z dimension or instrument information required when ordering.

Rectangular & Cylindrical with Quartz to Pyrex graded seal (GS)

- Quartz to pyrex graded seal fully fused to cell.
- Different diameters and lengths of graded seals can be supplied on request.

Rectangular & Cylindrical with straight tube (SBT)

- Quartz tube fully fused to quartz cell.
- Pyrex tube fully fused to pyrex cell
- Different diameters & lengths of straight bore tube can be supplied on request.

Rectangular for Low Temperature (HLT/GS) with Quartz to Pyrex graded seal

- 2mm thick walls.
- Fully fused 'welded' joints.
- Quartz to pyrex graded seal

Type 700. UHV Stopcock cells

- High vacuum patented stopcock.
- All cells will withstand evacuation $<10^{-11}$ Tor.
- PTFE threaded.
- Can be fused to most quartz cells.
- Stopcock itself can withstand pressure up to 5 bar (5×10^5 Pa).
- For cell pressure guidance; please enquire.

Rectangular Anaerobic with screw cap (GL14)

- Closed by screw cap or septum cap.
- **GL14/C** closed cap.
- **GL14/S** septum cap to allow filling, extraction or gas flow with syringe needle(s) through the silicone seal.
- Septum aperture diameter 9mm.
- Cap withstands pressure up to 5×10^5 Pa (5 bar).
- **GL14** can be fused to most rectangular and cylindrical cells with either one or two ports. Particularly suitable for stopping evaporation in cells used for stirring eg. **9/MS/GL14/Q/10**.

Rectangular with small screw cap (ST)

- Closed with screw cap, with or without septum aperture.
- Outside diameter of cap is less than the cross-section of the cell.
- Septum aperture diameter - 6mm.
- **ST/C** closed cap.
- **ST/S** septum cap to allow filling, extraction or gas flow with syringe needle(s) through silicone seal which has a PTFE face.

Type 126 & 128. Anærobic. Standard Rectangular 126-F & 128-F Fluorimeter

- Two polished windows except 126-F and 128-F have four windows and base polished.
- Reservoir has ground cone with evacuation hole to line up with socket outlet tube.
- Reservoir volume ≈ 1.5 ml.
- **Type 126** Evacuation tube is 3mm I.D., 5mm O.D. and 30mm long.
- **Type 128** Evacuation tube is 4mm I.D., 6mm O.D. and 30mm long.
- Socket assembly can be fused to other rectangular cells on request.

Type 46, 46-F Fluorimeter & 47 Flow cells. In-line

- Two polished windows. Type 46-F have 4 windows and base polished.
- Tubulations intended for push-on flexible tubing.
- Profiled inlet and outlet
- Inlet/outlet tubes - 2mm I.D., 4mm O.D. and 10mm long.

Type 71, 71B, 71F, 72, 72B & 72F Flow cells. Standard and semi-micro

- 71, 71B, 72 & 72B have two polished windows.
- Long sample compartment suitable for all Z dimensions.
- Inlet/outlet tubes - 2 I.D., 4 O.D., 16mm long intended for push-on flexible tubing.
- Also available with TC threaded connectors.
- 71-F & 72-F fluorescence cells have three polished windows.

Type 74.4 Flow cells. Dissolution. Short path length, long aperture

- Two polished windows.
- Path lengths of 0.5mm or less incorporate by-pass tubes to avoid back pressure and assist laminar flow through the sample compartment. Profiled sample compartment to optimise flow characteristics, reduces carry over and bubble retention.
- Inlet/outlet tubes - 2 I.D., 4 O.D., 10mm long intended for push-on flexible tubing.

Advantages of Starna® Type 583, 584, 576 & 585 series flow cells

- Fully fused body, accurately located in precisely formed extruded CNC drilled enclosure.
- Superior design, firm and accurate positioning of screw-in M6 gripper fittings with PTFE tubing, without reliance on the shear strength of intermediate bonding material.
- Polished top surface of the cell creates a positive seal with the PTFE face of the M6 gripper fitting, (see illustration), ensures a leak proof seal without dislodging the cell body or damaging the cell surface.
- A gap of ≈300 microns between the top of the cell body and the enclosure allows confirmation of a positive seal before use.
- Internally profiled inlet and outlet to each sample chamber optimises flow characteristic and performance, providing a smooth laminar flow wherever possible and reduces bubble retention.
- All cells are pressure tested to more than 5 bar after final assembly.
- Each cell is engraved with the path length and a unique identifying number, for full traceability throughout the manufacturing process.
- Cells with path lengths of less than 0.5mm or less are checked on a reference spectrophotometer before and after final assembly using an interference method. The path length is determined to an uncertainty better than 0.2 microns (0.0002mm). Path lengths of 0.5mm or greater are verified by physical measurement during the production processes.
- Flanged fittings, FEP tubing, and special adaptors Type TJ/G/038 for use with normal silicone tubing are available, see page 29.
- Short path length flow cells may be used as static short path length using a syringe and luer lock adaptor (see illustration).

Type 583.2.8 Flow cells. Dissolution. Micro aperture

- Two polished windows.
- M6 Screw-in connections.
- Profiled sample compartment to optimise flow characteristics, reduces carry-over and bubble retention.

- Two polished windows.
- M6 Screw-in connections.
- Profiled sample compartment to optimise flow characteristics, reduces carry over and bubble retention.
- Aperture with reduced height and volume for specific instruments such as Agilent 8453 and Varian Cary 50.

Type No.	Window Material	Path Length	Z Height	Sample chamber		External			Nominal Vol. ml
				W	H	L	W	H	
583.65.65	Q	1	15, 20*	6.5	6.5	12.5	12.5	35	0.042

583.65.65	Q	10	15, 20*	6.5	6.5	12.5	12.5	35	0.420

* When Z height is 20mm, external height is 40mm

Type 584.4 Flow cells. Dissolution. Short path length, long aperture

- Two polished windows.
- Long aperture.
- Path lengths of 0.5mm or less incorporate by-pass tubes to avoid back pressure and assist laminar flow through the sample compartment.
- M6 Screw-in connections.
- Profiled sample compartment to optimise flow characteristics, reduces carry over and bubble retention.

Type 9-F & 29-F Fluorimeter. Semi-micro. Type 17-F, 18-F & 28-F Fluorimeter. Micro

- Fits 12.5mm square cell holder.
- Four windows and base polished.
- **Type 9-F, 17-F & 18-F** have open top with non-sealing PTFE cover.
- **Type 28-F & 29-F** are closed by PTFE stopper, providing a liquid-tight seal.
- Base thickness - 3mm.
- Suitable for use with all standard cell holders.

Type No.	Window Materials	Path Length	Internal Width	External L W H			Nominal Vol. ml	Remarks
9-F	SOG, Q	10	4	12.5	12.5	45	1.400	Semi-micro with lid

Type 3-. Fluorimeter. Micro. Type 23-. Fluorimeter. Micro, with stopper

- Four polished windows.
- This range of micro fluorimeter cells is specially designed to be used with the FCA adaptors. The appropriate adaptor for the path length correctly aligns the cell in a standard 12.5mm square cell holder to maximise excitation and emission energy utilisation.

Type 16-F & 26-F. Fluorimeter. Sub-micro

- Three polished windows.
- Sub-micro volumes from 10µl to 160µl.
- **Type 16** has a top; comprising two black walls, two translucent side walls and a square internal cross section.
- Open top, supplied with non-sealing PTFE cover as well as a vaned lid to provide a liquid-tight seal.
- To avoid possible meniscus errors; it may be necessary to increase the nominal sample fill volume by at least 20%.
- May be used with all standard cell holders.
- Filling and emptying with a pipette is recommended.
- **Type 16.10-F4** has four polished windows.

Type 19.05F/L/Q/5/Z../MC Ultra-micro lens cell

- Four polished windows, with windows opposite the emission and excitation windows mirror coated to increase performance.
- **Type 19.05F/L** is a patented design with integral lens primarily designed for use with small cross section focussed beam instruments.
- The lens collimates the emission energy leaving the sample chamber onto the detector.
- Sample inserted and retrieved with micro pipette tip.

Type No.	Window Material	Path Length	Z Height	Sample chamber			External			Nominal Vol. ml	Remarks
				W	H	L	W	H			
19.05F/L	Q	5	8.5*, 15, 20	1	1	12.5	12.5	45	0.0050	*Cell height-38.5mm	

Type 4. Fluorimeter. Open top, Type 24 with stopper. Fluorimeter. Triangular

- Fits 12.5mm square cell holder.
- Three windows and base polished.
- **Type 24/SB/B**, self-masking.

Type No.	Window Material	Internal L	Internal W	External L W H			Nominal Vol. ml	Remarks
Open top

Type 52. with lid. Type 53 with stopper. Dual Path Length or Fluorimeter

- All windows and base polished.
- May be used as dual path length absorption cells or fluorimeter cells.
- Volumes equivalent to micro and semi-micro cells depending on internal width.

Type 55, 57 with lid & 56, 58 with stopper(s). Tandem, Divided, Mixing or Fluorimeter

- All windows polished except **Type 55-1/Q/10**.
- **Types 55 and 56** are for measuring two samples in series in separate compartments.
- **Types 57 and 58** are designed for mixing two samples after measuring in series.

Type 61-F, 62-F, 63-F. Water-jacketed Fluorimeter cells

- Inlet/outlet tubes - 2 I.D., 4 O.D., 10mm long intended for push-on flexible tubing.
- Stopper length on 61-F and 62-F, 20mm.
- **Types 62-F and 63-F** have emission windows 4.5mm x 22mm long.
- Base window 4.5mm x 4.5mm.

Type No.	Window Material	Path Length	External Height	Sample chamber W	Sample chamber H	Nominal Vol. ml	Polished Windows
61-F	Q	10	48	7.0	37	2.59	3

63-F	Q	10	48	4.5	37	1.66	5

Type 61. Constant temperature with stopper Type 62 & 63. Constant temperature. Semi-micro Type 64. Constant temperature. Sub-micro

- Two polished windows.
- **Type 64** sub-micro for heating small samples typically DNA.
- **Type 64** with Z15 overall height 45mm.
- Inlet/outlet tubes - 2 I.D., 4 O.D., 10mm long intended for push-on flexible tubing.

Type No.	Window Material	Path Length	External W	External L	External H	Sample chamber W	Sample chamber L	Sample chamber H	Overall Height	Nominal Vol. ml	Remarks

Type 65. Cylindrical constant temperature, standard and short path length

- Two polished windows.
- Maximised surface area contact for temperature controlling medium throughout the range.
- Tubulations intended for push-on flexible tubing.
- Closed by PTFE stopper, providing a liquid-tight seal. (65 & 100mm cells have two stoppers).

Type No.	Window Material	Path Length	External Dia.	L	Sample chamber Dia.	L	Overall Height	Nominal Vol. ml

Magnetic stirring

- Rectangular cells have a well for magnet location.
- Micro and semi-micro cells have a conical profile in walls for better mixing.
- One stir bar is supplied with each cell.
- For spare stirring bars (see page 28).

Type 39 Polarimeter. Standard and semi-micro

- Easy filling and emptying.
- Extended manufacturing process to ensure that they are free from birefringence effects which could affect the accuracy of measurements.
- Also available with two round windows, 39.35/2R and 39.105/2R.

Type No.	Window Material	Path Length	Internal Dia.	External Dia.	L	Nominal Vol. ml

39.105	PX	100	10.5	13	102.5	8.700

Type 300. Dye laser

- Dye laser cells are made with extreme accuracy having a surface flatness which extends all the way to the edge of the cell.
- Many of the fluorescent type of cells illustrated in this catalogue may be used for laser applications, however, to ensure their optical flatness, they are polished to more exacting tolerances.
- All Type 300 cells have four polished walls and base except 300/Q/20 and 300/Q/40 which have a grey base.
- Types 300/18.1/D, 300/28.1/D & 300/18.1/SBT15/D have a diagonal sample compartment for front surface fluorescence.

98	G	40	12	18	106	40	19.20

Type 100. Gel boat cells

- Two polished windows.
- Open top, no lid.

Type No.	Window Material	Path Length	Internal			External		
			W	L	H	W	L	H
100.3	Q	3	3	100	10	6	104	12
100.5	Q	5	5	97	10	7.5	100	10.5
100.6	Q	6	6	100	10	10	104	12
100.7	Q	7	7	100	10	11	104	12
100.8	Q	8	8	100	10	12	104	12

Cell holder, short path length

The cell holder **Type CH/2049** is designed for use with **Types 20 & 49** with path lengths of 3mm or less. Exterior dimensions are 12.5 x 12.5 x 52mm.

Type No.	Description
CH/2049	Cell holder, short path length

Cell holder, long path length

Cell holders **Type CH/50** and **CH/100** are for rectangular cells up to 50mm and 100mm path lengths respectively. The **CH/34/100** fits 50mm or 100mm **Type 34**. All are complete with a 75mm x 50mm back plate to fit standard infrared instrument holders.

Type No.	Description
CH/1/50	Up to 50mm cell holder
CH/1/100	Up to 100mm cell holder
CH/34/100	50/100mm T34 holder

Cell compartment spacers

Aluminium spacers, black anodised, available in three sizes for use with 1, 2, and 5mm path length cells, supporting them in a 12.5 x 12.5mm holder where there is no cell holder path length adjustment facility.

Type No.	Description
SPA/1	for 1mm path length cells
SPA/2	for 2mm path length cells
SPA/5	for 5mm path length cells

Magnetic stir bars

PTFE coated magnetic stir bars, available in packs of ten to fit the MS range of cells illustrated on page 26 of this catalogue. **Types 18/MS** and **28/MS** need the **MSB/6x1.5** to allow the stirring bar to enter the narrow sample compartment.

Type No.	Dimensions
MSB/5x2/10	5mm long x 2mm diameter
MSB/6x1.5/10	6mm long x 1.5mm diameter
MSB/6x3/10	6mm long x 3mm diameter

Quartz block inserts

Precision polished Far UV quartz inserts are intended for use with Standard Rectangular 10mm path length cells (see page 5), when a reduced path length is required without using a different cell. Four size combinations, each provide two different path lengths as indicated, by rotating the insert through ninety degrees.

Type No.	Path length	External L	W	H
QBI/101	1 or 5	9	5	48
QBI/102	1 or 2	9	2	48
QBI/103	1 or 0.5	9	9.5	48
QBI/104	1 or 0.05	9	9.95	48

Funnels

Plastic or glass funnel suitable for use with aspiration cells **Types 25, 28-AS** and **29-AS**. Funnel has approximate diameter of 30mm.

Type No.	Description
FUN/P/30	Plastic funnel 30mmø
FUN/G/30	Glass funnel 30mmø

Cell lids

Cell lids are available in PTFE up to 100mm long. Vaned polyethylene lids for 10mm rectangular cells only. Lids for large rectangular cells manufactured to special order.

Types 1 & 3	9	18
LID/1.001	LID/9.001	LID/18.001
1.002	9.002	18.002
1.005	9.005	18.005
1.010	9.010	18.010
1.010V		
1.020	9.020	18.020
1.040	9.040	18.040
1.050	9.050	18.050
1.100	9.100	18.100

Stoppers

Spare stoppers for all cells require cell type identification. The most common types are shown in the table below

Type No.	To fit
STP/C2.5	23-1.45, 2.45, 3.45
STP/C5	23-4.45, 31B, 21, 23 (5mm or less), 23-5.45
STP/C5L	62, 63
STP/C7	28, 29, 32 (up to 10mm)
STP/C10	21, 21N, 23
STP/C10L	34, 32 (over 10mm)
STP/C10.LHS/Z8.5	26/LHS/Z8.5
STP/C10.LHS/Z15	26/LHS/Z15 or Z20
STP/C10.10V	16R

Caps, closed & septum

Screw caps to fit GL14 or ST threaded tops available as either fully closed cap or septum seal cap.

Type No.	Description	Dia.	Height	Remarks
GL/14C	Closed cap	20mm	17mm	
GL/14S	Septum cap	20mm	17mm	
ST/C	Closed cap	12mm	12mm	
ST/S	Septum cap			Pack of 10
GL/S	Septum cap			Pack of 10

Anti-reflection & mirror coatings

Some fluorescent applications require either or both the excitation and emission energy to be enhanced by applying a metallic mirror coating to the outside of adjacent windows opposite to the source and the detector windows. Similarly, anti-reflection coatings on the other windows reduce reflective losses. Each suffix indicates coating for two adjacent walls per cell and is priced accordingly in the price list.

Type No.	Description
/AR	Anti-reflection coating
/MC	Mirror coating
/AR/MC	Anti-reflection & mirror coating

Fittings for 583, 584 & 585 Series cells

Universal single-ended connectors

- One pair of gripper fittings, M6 thread, consisting of one long and one short connector, single-ended.
- Each fitting comes with 1,5 metre of tubing as standard, other lengths available on request.
- PTFE tube is standard, 1.6mm O.D, 1mm I.D. FEP available on request.

Type No.	Description
TJ/G/1.5/PTFE	Pair of connectors, PTFE tube
TJ/G/1.0/FEP	Pair of connectors, FEP tube

Universal adaptors, screw fitting to flexible tubing

- Supplied in pairs, to convert M6 screw thread.
- Suitable for using push-on flexible silicone tubing or similar with a range of internal diameters from 1mm to 3.5mm.

Type No.	Description
TJ/G/038	Pair of adaptors, short and long barb

Fittings for TC external Quartz threads

- To fit male threaded quartz tubes fully fused to the cell.
- PTFE flange, ferrule and cap to screw onto the male thread, single ended.
- Each tube one metre length standard, 1.6mm O.D, 1mm I.D. Other lengths available on request.

Type No.	Description
MCTC/1.0	Pair of connectors, PTFE tube

Starna Optical Polishing Cloth

The Starna lint-free Optical Polishing Cloth is designed specifically for use with Starna Liquid Reference Materials sealed into quartz cells where the optical windows need to be kept scrupulously clean for all valuation procedures.

It may also be used for cleaning most types of normal glass and quartz cell windows.

Note: The cloth is not intended for use with any type of glass, metal or quartz filter.

Type No.	Description
CellClean/OPC	Lint-free Optical Polishing Cloth 25cm sq.

Starna® CellClean

Scrupulously clean glass or quartz cells are essential for consistent analytical results in all photometric disciplines. Starna® CellClean is an aqueous based cleaner with a unique combination of ingredients and provides cleaning actions that are able to lift, disperse, emulsify, sequester, dissolve, suspend or decompose. It may be used to remove oil, grease, resin, tar, wax, biological materials, insoluble oxides, fine particles and many other contaminants.

Type No.	Description
CellClean/150ml	Cell cleaner 150ml
CellClean/1000ml	Cell cleaner 1000ml

Varian C50 Dissolution connector spares kit

- One pair of gripper fittings, one long double-ended with M6 thread, to 1/4 28TPI female and one short double-ended with M6 thread, to 1/4 28TPI female.
- Each tube 30cm long between connectors.
- Clear PTFE tube standard coloured PTFE tubing available in following colours: Blue, Brown, Green, Natural, Purple, Red, White, Yellow.

Type No.	Description
TJ/G/C50	Pair of connectors, PTFE tube
TJ/G/C50x4	Four pairs of above, colours to be specified
TJ/G/C50x8	Eight pairs of above, one pair of each colour
TJ/G/C50x9	Set of 9 single dual path length inter-connecting tubing kit

Varian C100 Dissolution connector spares kit

- One pair of gripper fittings, one long double-ended with M6 thread, to 1/4 28TPI male and one short double-ended with M6 thread, to 1/4 28TPI male.
- Each tube 21cm long between connectors.

Type No.	Description
TJ/G/C100	Pair of connectors, PTFE tube
TJ/G/C100x9	Set of 9 single dual path length inter-connecting tubing kit

Luerlock Adaptor spares kit

- One Luerlock adaptor for use with syringe.
 - One screw fitting for overflow or to waste.
- Note: Syringe not included.

Type No.	Description
TJ/LLA/TJ/G	One Luerlock adaptor
	One screw fitting with tube

'Spinette' cell stirrer

'Spinette' cell stirrers offer the ability to simultaneously measure and stir the contents of specially designed cells (MS), see page 26. Mixing of solutions is with a tiny magnetic stir bar placed into a purpose made well at the bottom of the cell. A small electronic coil rotation assembly is placed under the cell in the sample compartment. This raises the cell by 5mm which, without affecting instrument operation may also reduce the required sample volume. The 'Spinette' will fit all standard spectrophotometers cell holders.

The speed of rotation can be adjusted with the controller which is connected to the electronic magnet by thin ribbon wire one metre in length. This will not interfere with insertion or removal of cells from the sample compartment and will also allow instrument covers to close normally.

Magnetic stir bars are available to fit the specially designed MS range of cells with 'stirring wells' depicted on page 26. When

purchasing stir bars separately for use with micro cells, the correct size must be selected. One stir bar is included with each MS cell. Typically, a cell filled with aqueous solution up to 30mm from the base, may be fully mixed within five seconds. The Spinette cell stirrer is supplied complete with speed controller, electronic rotation platform, ribbon wire and one stir bar. There are two models available, one with input voltage of 110 VAC and the other 220/240 VAC, see below.

Type No.	Description
SCS1.22	Spinette cell stirrer 240 VAC
SCS1.11	Spinette cell stirrer 110 VAC

Ultra High Vacuum (UHV) cells

- Designed for use in vacuums $<10^{-9}$ Torr
- Fully heat fused.
- Windows polished to $\lambda 10$ per cm^2 .
- 20/10 scratch & dig.
- Far UV synthetic quartz or borosilicate.

Type No.	Window Materials	Typical dimensions	
		Internal	External
UHV	Q	20 x 20 x 97	26 x 26 x 100
UHV	Q	24 x 24 x 97	30 x 30 x 100
UHV	Q	30 x 30 x 96	38 x 38 x 100
UHV	Q	40 x 40 x 95	50 x 50 x 100

A wide variety of UHV cells are produced. Used for quantum mechanics experimentation including Bose Einstein condensate experiments. Custom sizes can be manufactured to special order. Borosilicate materials may be used for UHV cells when dimensions allow.

Dimensions should be specified when ordering either internal or external. Multilayer 'V', 'W' or broadband coatings available for specific wavelengths.

Fluorescent reference materials

Molecular fluorescence spectroscopy is a sensitive and often selective technique. Unlike absorption spectrophotometry it is not an absolute technique: instruments therefore require calibration before every series of measurements. This may be achieved using a stable reference material, which should absorb and emit at similar wavelengths to the samples of interest. Use of the general purpose fluorescent reference material set type 6BF enables the day to day stability of instruments to be measured.

The 6BF reference materials are not standards with absolute values, but a set of six relatively stable fluorescent materials in a polymethylmethacrylate matrix with which the stability and precision of the instrument can be monitored. Four blocks exhibit broad band spectra which cover the normally used UV and visible region of the spectrum, with considerable overlap. Two blocks contain materials suitable for illustrating the selectivity of the technique as well as checking instrument resolution and wavelength calibration. The materials have the following advantages:

Stability: no degradation, no evaporation.

Safety: no chemicals to mix.

Robust: unbreakable, easy to store and use.

Further information can be found in the **Starna®** booklet entitled: "**Reference Materials for Molecular Fluorescence Spectrophotometry**"

Also available in permanently flame-sealed cells are the following references for fluorimeter applications.

Quinine Sulphate [RM-QS]

solution in sealed cells for fluorescent instrument qualifications.

Rhodamine [4-TB/Rhodamine/101]

flame-sealed into triangular cells for quantum yield and spectral correction.

Water cell [3/Q/10/Water]

suitable for Raman Band signal to noise determination.

Instrument validation

NIST Traceable Glass & Liquid References

- * **Starna** are a world leading manufacturer and supplier of **Certified Reference Materials [CRMs]** for UV, Visible and Near Infrared photometer applications. All CRMs are manufactured to **ISO 17025 & ISO Guide 34** in the **Starna UKAS accredited laboratory**.
- * **Starna** CRMs meet all current international regulatory validation requirements for UV, Visible and Near Infrared spectrophotometer instruments.
- * Glass filter CRMs are manufactured to the exacting standards required by **National Metrology Institutes [NMIs]**.
- * All Starna liquid references are heat fusion-sealed, eliminating both contamination and leakage issues. Starna has forty years experience in the production of heat fusion - sealed references.
- * A **Lifetime Guarantee** covers all Starna UKAS Certified references, provided the CRMs are re-certified at least every two years and are used in compliance with the conditions of use, stated in the documentation enclosed with each set.
- * **Re-calibration service** with a guaranteed five working day turn-round is available from the Starna Calibration Laboratory, for all references. Some third party references can also be certified to ISO 17025 standard.

Below are some typical set designations to meet various regulatory requirements.

Full details of all references are available from Starna.

European Pharmacopoeia - RM-0660HLKCTX

Potassium Dichromate 60 & 600mg/l, Holmium Perchlorate, Potassium Chloride, Toluene/Hexane

Full Pharmacopoeia - RM-0660HLKCSITX

Potassium Dichromate 60 & 600mg/l, Holmium Perchlorate, Potassium Chloride, Sodium Iodide, Toluene/Hexane

United States Pharmacopoeia (USP) - RM-06HLKITX

Terms of sale

Normal terms of sale are net 30 days, FOB Hainault to recognised accounts. Under our terms of sale 'Title of ownership of any goods shipped does not transfer until the goods have been paid for in full'.

Product warranty

Starna® Spectrophotometer and Fluorimeter cells are warranted to meet the specifications shown on page 2 of this catalogue and be equal to or better than the dimensional tolerance for each cell listed. Stringent quality control is exercised throughout production with only guaranteed and brand named raw materials used, so that cells will perform to the highest specification for any given design. Any goods to be returned under warranty require a Return of Merchandise Authorisation (RMA) number, which can be obtained by calling our Customer Service Department. We reserve the right to change the design or specification of any product without prior notification.

Technical information

Technical staff are available to assist in the selection of cell material or physical configuration to satisfy individual applications.

Method of shipment

Prices do not include shipping costs, duty or tax. Normal shipment, unless otherwise specified, is by recorded letter or parcel post. Overnight service is available via Carrier or Data Post. Overseas shipments utilise Air parcel or letter post, UPS, TNT, DHL, FedEx or regular air freight. Unless specified otherwise all shipping charges are prepaid and added to the sales invoice.

Stock items

Great efforts are made to stock the widest range of products so that purchase orders can be shipped the day they are received. Any item temporarily out of stock will be back ordered and shipped when available from production unless otherwise instructed.
